Priority Planning Areas

This map identifies areas near tidal water bodies at increased risk of inundation under a 2 foot sea level rise scenario, projected to occur as soon as 2060.

This map was produced by Broward County in partnership with the South Florida Water Management District (SFWMD) and the National Oceanographic and Atmospheric Administration (NOAA).

The model uses a V-DATUM sea level surface developed by NOAA to determine the elevation of the mean higher high water events. The land elevation was generated using LIDAR (Light Detection and Ranging) remote sensing technology that accurately measures elevations using airborne lasers. The 2007 LIDAR elevation dataset was developed for the Florida Division of Emergency Management. The timeline for a two foot sea level rise is based on the Southeast Florida Regional Climate Change Compact unified sea level rise projection for the Southeast Florida. Priority Planning Areas are limited to the coastal communities with land east of the SFWMD's salinity control structures.

Students generated are based on the student generation rates contained in the currently adopted Broward County Land Development Code. A traditional cohort survival methodology is used to project school-by-school District traditional school enrollment out over the next five years, and a proportional share of charter school enrollment is used to project future charter school enrollment by school level Districtwide. For more information: <http://www.broward.k12.fl.us/dsa/EnrollmentProj.shtml>. The annual benchmark enrollment is used to apply individual charter school enrollment impacts against school facility review processes.

Information contained in the application indicates that the approximately 5.11-acre site is generally located at the west side of Pine Island Road between NW 41st Street and NW 38th Street in the City of Sunrise. The current zoning designation for the site is B-4, which allows no residential units. The applicant proposes to change the zoning designation to RM-25 to allow 119 mid-rise units which are anticipated to generate 5 additional students (3 elementary, 1 middle, 1 high schools) into Broward County Public Schools.

This application was reviewed based on its location in the School District's Long Range Seven Planning Areas, and Ten-Year Long Range Plan contained in the Adopted District Educational Facilities Plan (DEFP). However, the statistical data regarding the Level of Service (LOS) standard status of the actual schools impacted by this land use application in the initial five years of the ten-year period is depicted herein for informational purposes only.

Schools serving the amendment site in the 2013-14 school year are Wellesby Elementary, Westpine Middle, and Piper High. Based on the District's Public School Concurrency Planning Document, all of the schools are operating below the adopted LOS of 100% of their capacities in the 2013-14 school year. Incorporating the cumulative students anticipated from approved and vested developments anticipated to be built within the next three years (2013-14 – 2015-16), all the schools are expected to operate below the adopted LOS of 100% through the 2015-16 school year. It should be noted that the school capacity or Florida Inventory of School Houses (FISH) for the impacted schools reflects compliance with the class size constitutional amendment and the permanent capacity additions that are planned for the schools within the first three years of the Five-Year Adopted DEFP FY 2013-14 – 2017-18. Also, to ensure maximum utilization of the impacted Concurrency Service Areas, the Board may utilize other options such as school boundary changes to accommodate students generated from developments in the County. Charter schools located within a two-mile radius of the site in the 2013-14 school year and their enrollment information are depicted herein.

Capital Improvements scheduled in the long range section (2018-19 to 2022-23) of the currently Adopted DEFP Fiscal Years 2013-14 – 2017-18 regarding pertinent impacted schools are depicted above. Based on the School District's Seven Long Range Planning Areas, the amendment site is located within School District Planning Area "C" and the elementary, middle, and high schools currently serving Planning Area "C" and their cumulative student enrollments, cumulative capacities, and pertinent student enrollment projections are depicted herein.

Therefore, Planning Area "C" is anticipated to have sufficient excess capacity to support the students generated by the residential units proposed in the Planning Areas.

Please be advised that if approved, the units from this project will be subject to a public school concurrency review at the plat, site plan (or functional equivalent) phase of development review, whichever comes first.
