Re: Basis & Justification for Consultant Selection for Professional Engineering Design Services for the Osprey South Water Distribution and Service Line Replacements Project

The Utilities Department assigned professional engineering design services to BCC Engineering, LLC for assistance with designing, permitting, and bidding for the Osprey South Water Distribution and Service Line Replacements Project.

Basis

The Osprey South Water Distribution and Service Line Replacements project is part of the City's Five-year Capital Improvement Program with funding available for this fiscal year for design services.

Justification

BCC Engineering, LLC has provided the City a reasonable proposal for these design services related to this project and is capable of performing the services based on their experience and availability. This assignment has been evaluated for compliance with the objective of equitable distribution of work to the various design consultants under the Continuing Services Agreement, and it is consistent with that objective.
