Re: Basis & Justification for Consultant Selection for Professional Construction Management Services for the Southwest WWTP Sodium Hypochlorite System Improvements Project

The Utilities Department assigned professional engineering services to Black & Veatch Corporation, for assistance with construction management services for the Southwest WWTP Sodium Hypochlorite System Improvements Project.

Basis

The Southwest WWTP Sodium Hypochlorite System Improvements project is part of the City's Five-year Capital Improvement Program with funding available for this fiscal year for design services.

Justification

Black & Veatch Corporation completed the design for the Southwest WWTP Sodium Hypochlorite System Improvements Project. Black & Veatch Corporation has provided the City a reasonable proposal for the associated construction management services related to this project and is capable of performing the services based on their experience and availability. This assignment has been evaluated for compliance with the objective of equitable distribution of work to the various design consultants under the Continuing Services Agreement, and it is consistent with that objective.
