Re: Basis & Justification for Consultant Selection for Professional Engineering
Construction Management Services for the Springtree WWTP Odor Control and Sludge Holding
Tank Improvements Project

The Utilities Department assigned professional engineering services to Black & Veatch Corporation for assistance with construction management services for the Springtree Odor Control and Sludge Holding Tank Improvements Project.

Basis

The Springtree WWTP Odor Control and Sludge Holding Tank Improvements projects are a part of the City's Five-year Capital Improvement Program with funding available for this fiscal year for construction management services.

Justification

Black & Veatch Corporation completed the design for the Springtree Odor Control and Sludge Holding Tank Improvements Project. Black & Veatch Corporation has provided the City a reasonable proposal for these design services related to this project and is capable of performing the services based on their experience and availability. This assignment has been evaluated for compliance with the objective of equitable distribution of work to the various design consultants under the Continuing Services Agreement, and it is consistent with that objective.
