

SOLE SOURCE/SINGLE SOURCE JUSTIFICATION FORM

Date: 06/10/2026 Department: Leisure Services Requisition No.: _____

Department Contact: Nic Ortiz

Proposed Sole Source Vendor: Hoover Pumping Systems Vendor No.: 146

One-Time Purchase ☐ Purchase Amount: \$ _____

Annual Purchase ☒ Estimated Annual purchase amount: \$ 190,000 (FY26)

1. Description of Services/Products: (Attach a quote in addition to filling out this section)

The existing irrigation pump system at the Springtree Golf Club 23 years old, exceeding its 15-20 year lifespan, and requires frequent repairs. This equipment is critical for the golf course to continue to operate. A full replacement of the system is now required. In addition to the purchasing and installation, this sole source will also cover the service and repair of the irrigation system.

2. The basis for this sole source determination and the reason no other vendor/product is suitable: (Attach Sole Source Letter from Vendor in addition to filling out this section)

Hoover Pumping Systems offers specialized products and services which provide single source, comprehensive pump systems solutions. Their products are not available through any distribution network, but only directly from their factory in Pompano Beach, Florida. Third parties are not allowed to install &/or service it. The Hoover System is the only one compatible with the old irrigation system. There is an existing infrastructure which helps with integration, standardization, hence the avoidance of major replacements, restructuring costs and major operational disruptions. The system is designed, manufactured, installed, and serviced by Hoover. The software used (FLOWGUARD™) cannot be used on a different brand. So, keeping the same system will avoid software migration, data loss and necessity of new training.

3. By signing this form I certify that a market research has been performed and if market conditions change in the foreseeable future and sole source conditions change, the Department will discontinue using this sole source justification and will procure the goods or services competitively.

Sole Source Irrigation Pump System Manufacturer/Service Provider

City of Sunrise

Re – The Bridges at Springtree Golf Course Pump Station Replacement

To Whom It May Concern:

Hoover Pumping Systems offers specialized products and services which provide single source, comprehensive pump system solutions. Hoover Pumping Systems' products are not available through any distribution network, but only directly from our factory in Pompano Beach, Florida. The quote provided for this irrigation pump system is factory direct pricing.

Since 1984, the company has provided design assistance, single source factory direct manufacturing, field installation and repair service to the landscape irrigation industry. Hoover Pumping System's singular field capabilities and pump system features establish the Hoover solution as a one-of-a-kind, sole source product.

Hoover Pumping Systems sole source features and capabilities are listed below:

- 1) Pump system design, manufacturing, installation, and service are performed in-house with company personnel and equipment, offering sole source responsibility for performance.**
- 2) Hoover pump systems are available for sole source direct factory purchase.**
- 3) Standardized system features are configured to meet specific project requirements. These features are recognized and understood by personnel throughout the landscape industry.**
- 4) The Flowguard water management tool was developed and designed solely by Hoover. No other manufacturer offers a comparable product for real time and historical data along with integrated logic controls for optimal pump station functionality and efficiency.**
- 5) Materials and components are rated for exposure to Florida's harsh environmental conditions such as driving rain, excess heat, high humidity, water quality, dust, insects, reptiles, and electric service.**
- 6) Filtration systems for Florida's biologically rich lake sources can be integrated into pump system controls including self-cleaning intake screens and pump discharge filtration.**
- 7) Factory trained Hoover employees provide field installation and repair services utilizing a fleet of company equipped trucks, tools, machines and on-board Factory Parts inventory.**

Increasing water usage regulations, the demand for energy and water efficiency, and the use of alternative water supplies adds significant complexity to irrigation pump system configuration. Large investments in landscaping are jeopardized when irrigation pump system performance is not satisfactory.

Please contact me if you have any questions or need additional information. Thank you.

Sincerely,
